

Erin Daina McClellan

STATEMENT OF INTEREST

After 2 years in corporate consulting, designing and delivering training for leading telecommunication companies; 5 years completing both M.A. and Ph.D. in Communication; and 12 years implementing various programs across the U.S. higher education system, I continue to work with global stakeholders who have direct impact on their communities. My past experiences working with teams implementing product-based training systems for clients in both F2F and online platforms, and most recently working in academic leadership teams has provided me with the unique and broad experiences needed to connect with and support global stakeholders in various ways. I continue to engage and work to lead higher education, DE&I work, and research that connects the philosophy of communication to lived experiences in the world by focusing on urban communication contexts, both physically and socially constructed.

EDUCATION
